

protel Housekeeping

The app for housekeeping staff and maintenance teams

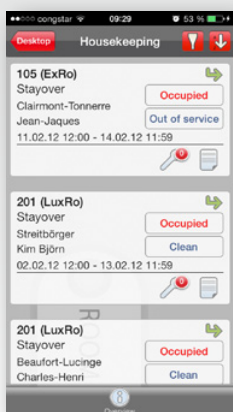

The native app for the Apple iPod touch or the iPhone links the housekeeping staff, maintenance teams and front desk managers, allowing them to share live information on housekeeping and maintenance issues.

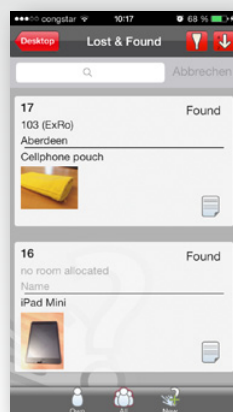

- ▼ **Housekeeping list**
Check and change the occupy state (occupied, vacant) and the room status (cleaned, dirty, touched, cleaning in progress, checked).
- ▼ **Maintenance orders**
Create and edit orders, add new pictures using the iPod or iPhone or use pictures from within the app.
- ▼ **Lost & Found**
Create and edit entries, add new pictures using the iPod or iPhone. Items are immediately shown in protel Front Office.
- ▼ **Traces**
View and edit the tasks of all departments (protel Traces).
(For protel SPE and MPE, and soon available for protel Air)

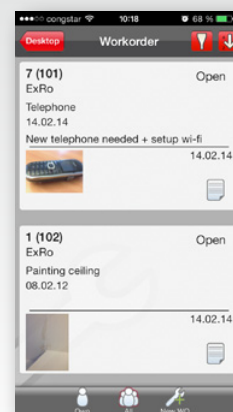

All data is continually synchronized with protel. In areas with no Wi-Fi access, the app switches to offline mode and then syncs automatically with protel once it's online again.

Room list with information about room status, actual occupancy and guests

For all things lost and found:
„For there is nothing lost, that may be found, if sought.“

The list of maintenance orders provides all information the janitor needs for his work.

protel Housekeeping is a native app for the Apple iPhone or the iPod touch. The app can be used as an optional add-on to the protel SPE, MPE, and protel Air hotel management systems.
